

Plastic Rolling Platform Dimensions

Bottom metal frame

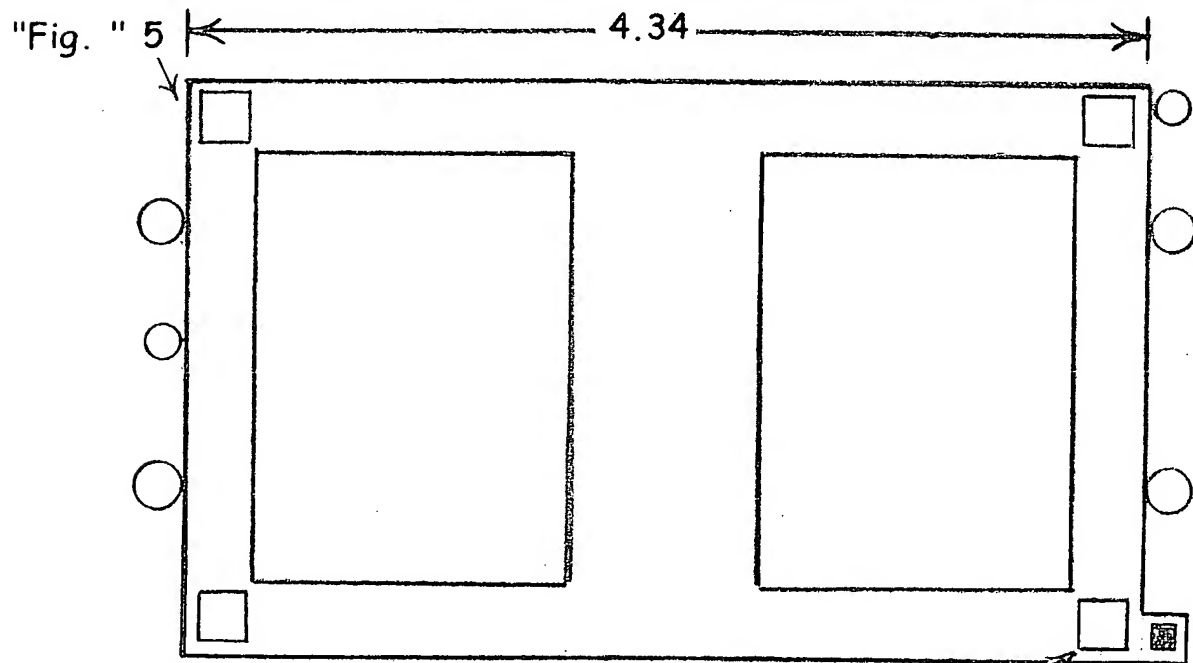

Lightweight skeletal frame with two large openings

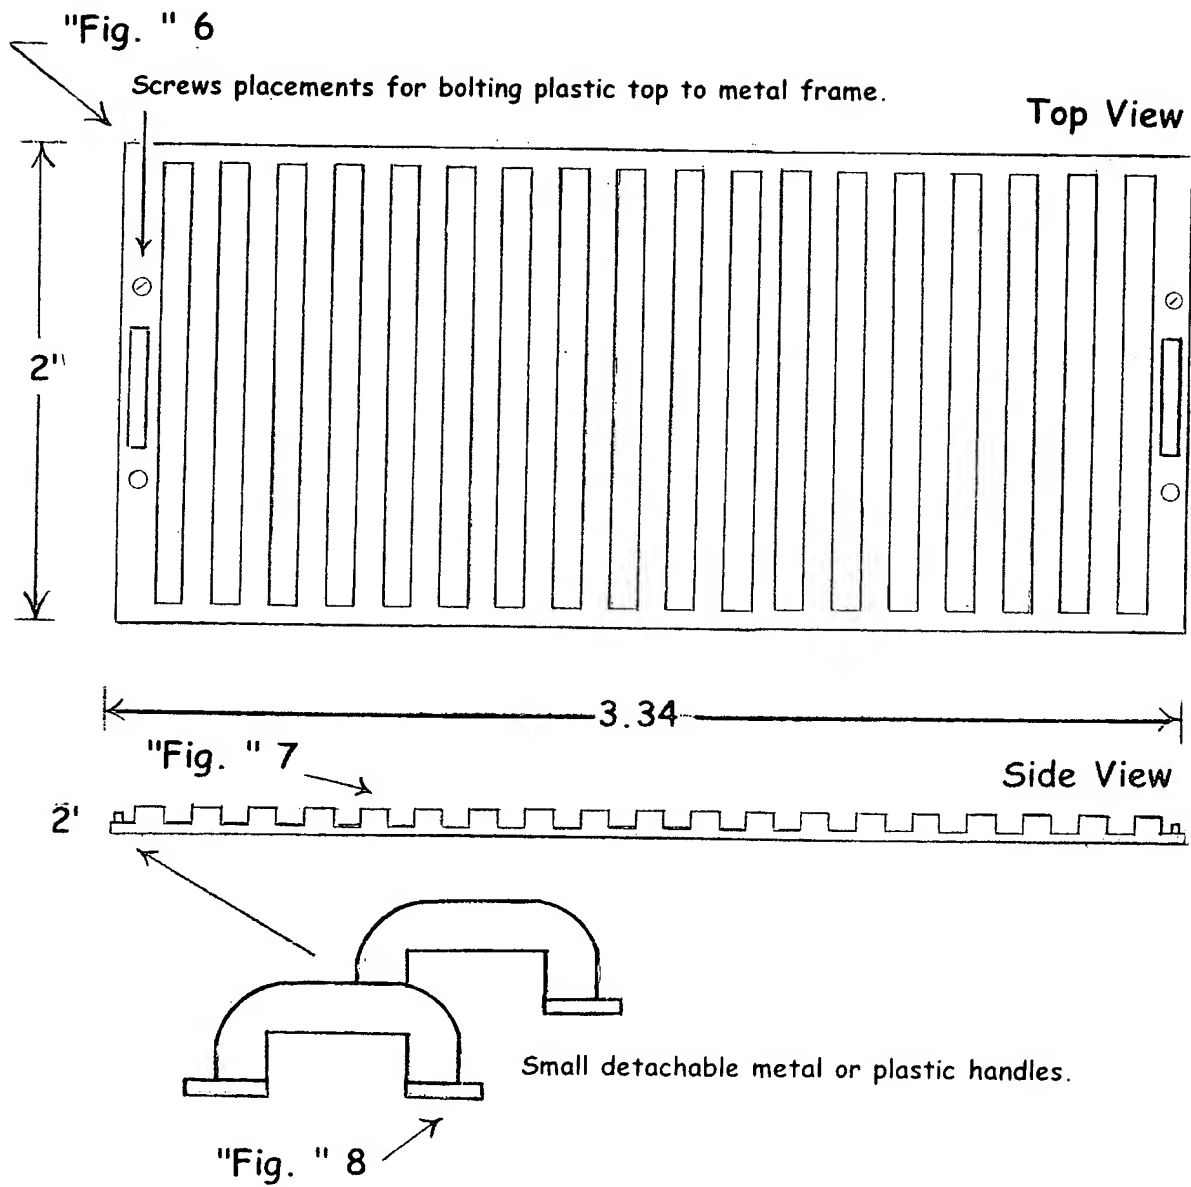

Top metal frame

Side view

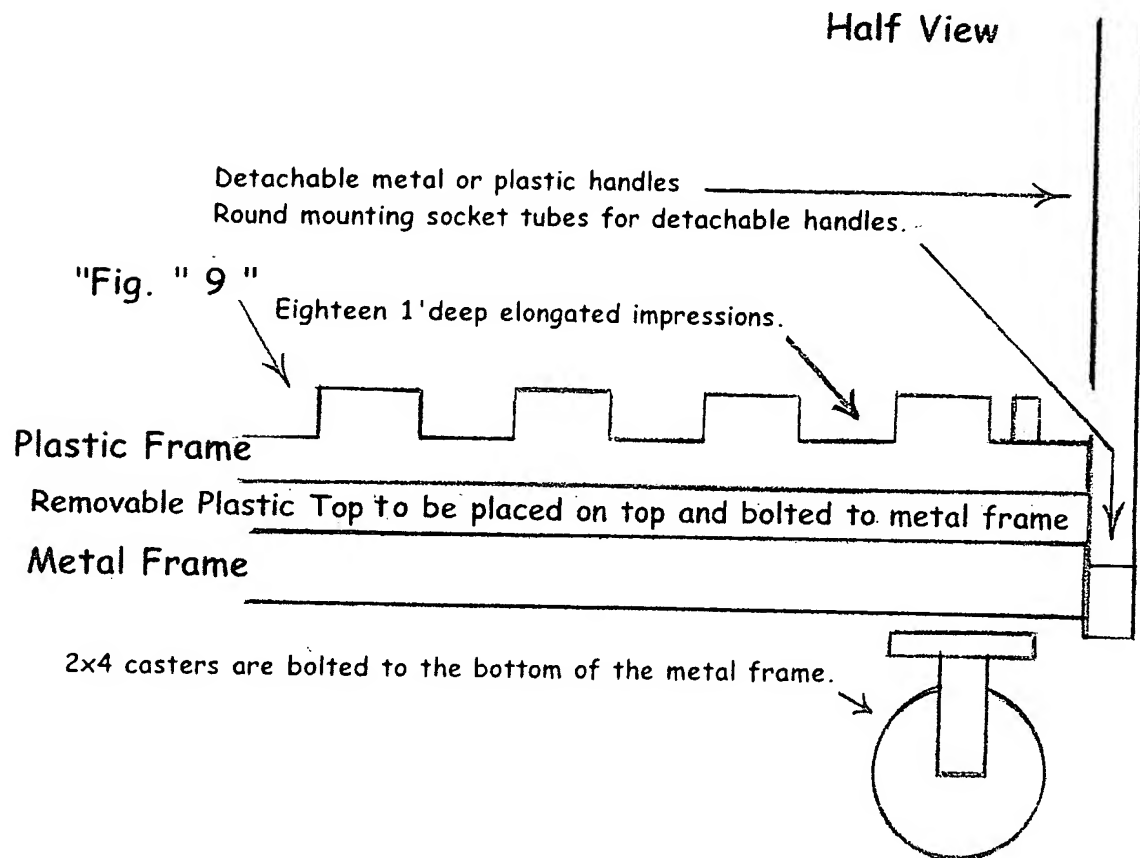

Bottom metal frame. Four 2x4 Casters

Removable Plastic Top

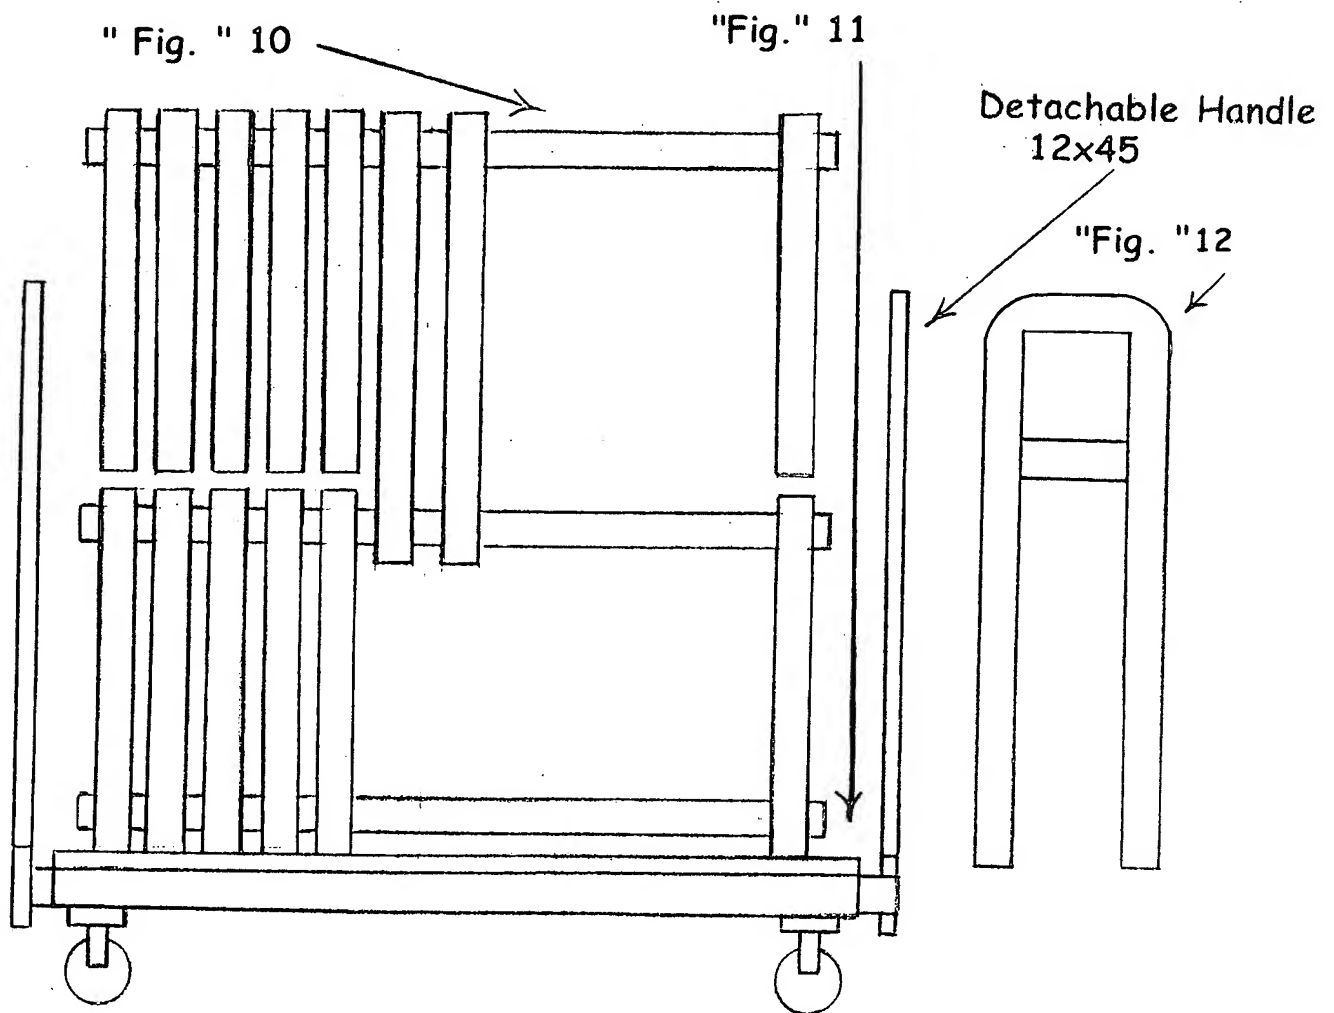

Blow-up view of the plastic rolling platform

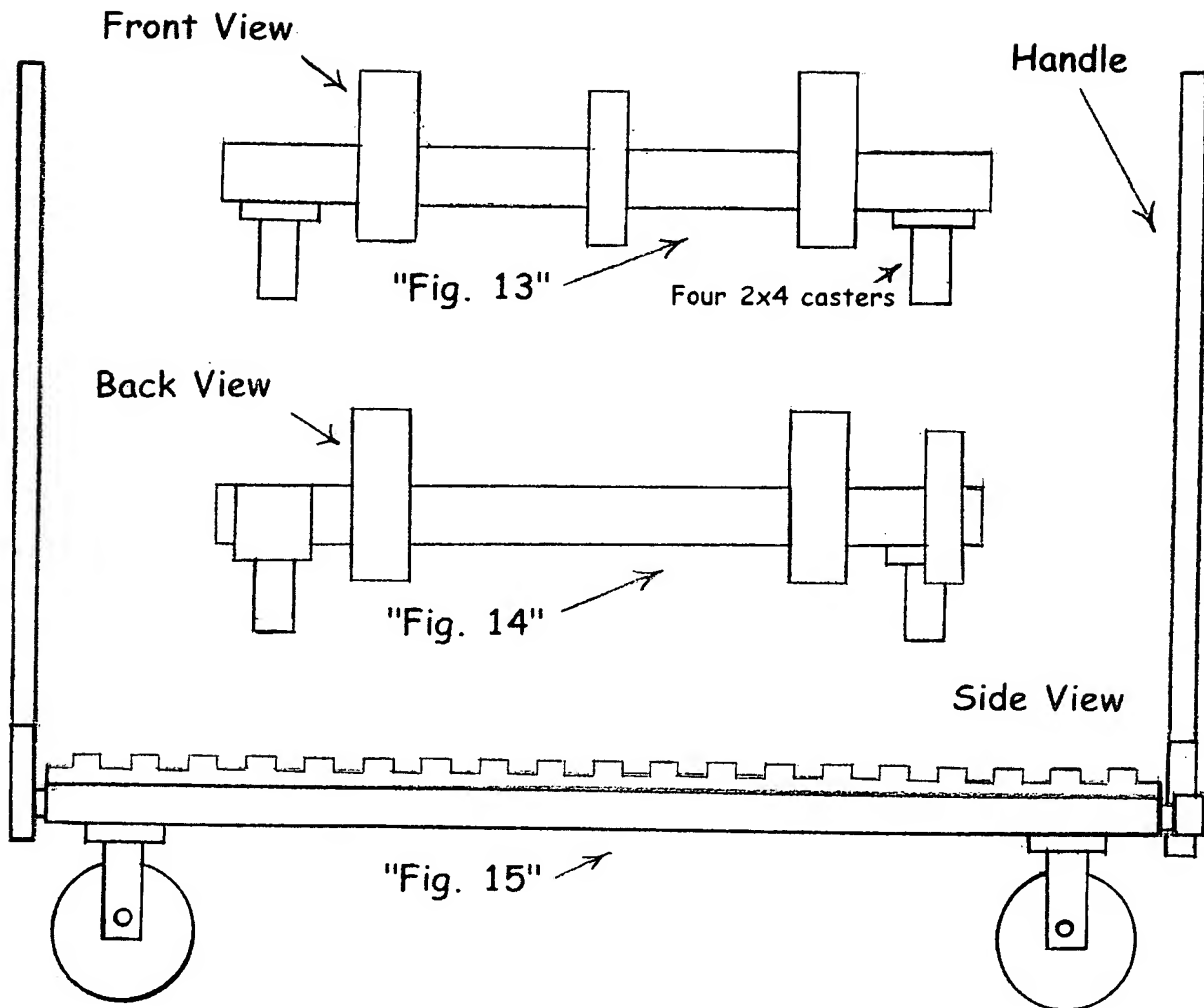

Four or six side holes for two small plastic or metal detachable top side handles on each side of the removable plastic top. This is for easy lifting and placement of the removable plastic top frame to the rolling plastic platform.

Because of its lightweight the assembled removable shelf's frame can easily be placed on the plastic rolling platform.

Bottom metal frame

Finish construction of the rolling plastic platform
